THE OFFICIAL NEWSLETTER OF THE CIRCLE CITY FLYERS

PRESIDENT'S MESSAGE — AUGUST 2019

The Scale Fly-In event on August 17th was an overwhelming success! Pilot participation and the amount of slurry funds that went into the collection pool from this event was HUGE. Good times were had by all as every pilot station was occupied and many spectators stopped by to check out the excitement. Pilots were flying all day so there was always something scale in the air to watch. We had all types of scale aircraft, everything from small/medium scale foamies, to large-scale meticulously built kit planes where the attention to detail was off the charts. The skills of some of our club members is amazing! We also had many donations to the event raffle from some great vendors (Hobby Town Corona, SIG, Pegasus Hobbies) as well as a few club members. Congratulations to the winners of the best scale military, civilian, foamy & Best of Show, your engraved plaques are well deserved. Thank you to everyone who supported the club by being there to fly and for the many raffle tickets that you all purchased. ALL the raffle profits went right into the slurry fund. Thank you to Jesse & Allen for coordinating the event & many thanks to the many volunteers that helped in the days leading up to the event, that helped set up on Friday, that worked the event, that took pictures and then helped clean up after it was over, Thank You! Hot Diggidy Dog was there selling delicious food to all the hungry participants. The board and I are ecstatic to have put on this event for the members and by the feedback we are receiving from all of you, everyone had a wonderful day. We even added at least one new club member. By all accounts, it was a success!

On another note and something we all need to be prepared for starting with 2020 member renewals, CCF will REQUIRE a copy of your FAA registration card along with AMA membership to renew next year. Several clubs were already shut down due to violations of the FAA requirement so the board is being proactive with this requirement. It's only \$5 for 3-years of FAA registration so this should be a non-issue for pilots. Go to this website to register: <https://faadronezone.faa.gov>

Finally, something we need to start thinking about is nominations for next year's board. If you would like to run for office or you would like to nominate someone for office please email your nominations to Ethan Marsh at circlecityflyers@aol.com. If you nominate someone, please discuss it with them first. Voting will take place during the November meeting & the winners will be announced at the 2019 Christmas party.

THE NEXT CLUB BOARD MEETING IS AT DELEO FIELD on the 3rd Saturday of September (Sept. 21st). We have a small raffle every meeting so please come to the meetings to hear about what's going on in the club & maybe you'll win something there too!

On final approach - Rick

Final Flight

The club is sad to report that club member Tom Beaubien passed away a few weeks ago. He was 90 years old. Tom joined the club in 2002 and could be seen at the field talking to his friends and watching the airplanes. At our recent Scale Event we held a moment of silence in memory of Tom. We extend our deepest sympathies to his family.

Circle City Flyers is a group of people who love RC flying.

Normal folks, who find the utmost joy in creating and flying wonderful machines that inspire awe and put just a bit of color in the sky.

CCF is a non-profit, AMA affiliated flying club.

The CCF has one of the best flying facilities in Southern California. We are located just south of Corona, California, just a few minutes from the 15 Freeway.

The club is well established and member's interests range from helicopters to 3D Planes. We fly gas, turbines, electric, glow, scale, profiles and combat wings. We have RC pilots who have flown for 40+ years, and beginners who are just learning the joys of flight. Got a question? Just learning? Curious? Come on down!

You can find folks flying most days, with the weekend mornings being very popular. Mornings are calm with winds generally increasing throughout the day.
